

Spectralink Wireless Solutions for Microsoft Lync and Skype for Business

Leverage your Microsoft UC Solution

Microsoft Partner
Silver Communications

Spectralink offers the only enterprise wireless mobility solutions qualified for Microsoft® Lync® environments, and thus compatible with Skype for Business as part of its support of Lync-qualified devices. Customers who add Spectralink DECT or Wi-Fi solutions to their installations benefit from increased workplace mobility, improved staff efficiency, and a high ROI.

BENEFITS

- **Tested and Qualified***. The Spectralink DECT and Wi-Fi solutions have been tested and qualified by Microsoft
- **Direct interoperability**. Eliminate the need for a gateway, reduce complexity and costs
- **Increased ROI**. Reduce administration costs, reduce downtime and increase efficiency and productivity
- **Streamlined administration**. Increase flexibility and streamline administration by enabling your IT-department to centrally administer, modify and control the entire solution
- **Mobility**. Add mobility to improve productivity, communication and satisfaction within verticals such as healthcare, retail, manufacturing and many other specialized working environments
- **Customized solution**. Mix industry-customized wireless handsets to meet the individual need of each employee

* DECT Server 2500 & 8000 are in qualification process.

Integrate Directly

Spectralink offers unique wireless in-building telephony solutions that interoperate with Lync and therefore, Skype for Business without the use of a gateway. This direct integration simplifies deployment and administration, reduces hardware and support costs and further accelerates your ROI.

Benefit from faster deployment, reduced complexity, and greater system control. Your IT department can centrally administer, modify, and control the entire solution.

Get Specialized

With Spectralink you can combine Lync or Skype for Business with purpose-built wireless devices customized for verticals such as healthcare, manufacturing, retail and many other specialized working environments.

Deliver the power of Lync and Skype for Business to your mobile users with Spectralink wireless advantages:

- Excellent voice quality
- Enterprise-grade durability and security
- Integration with business processes and applications
